

VISITING PROFESSOR SEMINAR

ABOUT THE SPEAKER

Mathieu Bollen is Professor and Chair of Department of Cellular and Molecular Medicine at the Katholieke Universiteit Leuven, Belgium. He is world renowned for his work on the role of reversible protein phosphorylation in the control of cellular physiology. He heads the Laboratory of Biosignaling and Therapeutics, where his research is focused on elucidating novel molecular signaling pathways, delineating their contribution to human diseases, and defining molecular components that can be explored as biomarkers or therapeutic targets. His group is currently investigating the therapeutic potential of protein phosphatase-1 and NPP-type ectophosphodiesterases, and examining the importance of methylation of Polycomb group target genes as a biomarker for different stages of cancer.

MITOTIC FUNCTIONS OF PROTEIN PHOSPHATASE-1

Speaker:

Prof. Mathieu Bollen
Laboratory of Biosignaling & Therapeutics
Department of Cellular and Molecular
Medicine, Belgium

Host:

Prof. Shirish Shenolikar
Senior Associate Dean
Office of Research,
Duke-NUS Graduate Medical School

Date:

Wednesday, 1 Feb 2012

Time:

11.00am – 12.00pm

Venue:

Duke-NUS Graduate Medical School,
Conference Room 4D (Level 04)
8 College Road, Singapore 169857

Contact Person:

Shanti Rajaram
Office of Research
Tel: 65167266
